

1. Create the below pattern using nested for loop in Python.

```
*  
* *  
* * *  
* * * *  
* * * * *  
* * * *  
* * *  
* *  
*
```

2. Write a Python program to reverse a word after accepting the input from the user.

**Sample Output:**

Input word: ineuron

Output: norueni
